The gross reinsurance recoverables on paid and unpaid claims and claim adjustment expenses represent the current and estimated future amounts due from reinsurers on known and unasserted claims. The ceded reserves are estimated in a manner consistent with the underlying direct and assumed reserves. Although this total comprises recoverables due from nearly one thousand different reinsurance entities, about half is attributable to 10 reinsurer groups.

The net reinsurance recoverables reflect an allowance for uncollectible reinsurance that is based upon the Company's ongoing review of amounts outstanding, reinsurer solvency, the Company's experience, current economic conditions, and other relevant factors. Of the total net recoverables due from reinsurers at June 30, 2009, after deducting mandatory pool and structured settlement balances, \$6.6 billion, or 80%, were rated by A.M. Best Company. Of the total rated by A.M. Best Company, 98% were rated A- or better. The remaining 20% net recoverables from reinsurers were comprised of the following: 7% related to the Company's participation in voluntary pools, 9% related to recoverables from captive insurance companies and 4% were balances from other companies not rated by A.M. Best Company. In addition, \$2.4 billion of the net recoverables were collateralized by letters of credit, funds held and trust agreements at June 30, 2009.

The mandatory pools and associations represent various involuntary assigned risk pools that the Company is required to participate in. These pools principally involve workers' compensation and automobile insurance, which provide various insurance coverages to insureds that otherwise are unable to purchase coverage in the open market. The costs of these mandatory pools in most states are usually charged back to the participating members in proportion to voluntary writings of related business in that state. In the event that a member of the pool becomes insolvent, the remaining members assume an additional pro rata share of the pool's liabilities.

The structured settlements represent recoverables from annuities that were purchased from life insurance companies to settle personal physical injury claims, with workers' compensation claims comprising a significant proportion. In cases where the Company did not receive a release from the claimant, the Company retains the liability to the claimant in the event that the life insurance company fails to pay; accordingly, the Company continues to report the amount due from the life insurance company as a liability and as a recoverable for GAAP purposes. The Company's too five groups by structured settlement is as follows:

	A.M. Best Rating of Group's	Ju	ıne 30,	December 31,

The Travelers Companies, Inc. Financial Supplement - Second Quarter 2009

Glossary of Financial Measures and Description of Reportable Business Segments

The following measures are used by the Company's management to evaluate financial performance against historical results and establish targets on a consolidated basis. In some cases, these measures are considered non-GAAP financial measures under applicable SEC rules because they are not displayed as separate line items in the consolidated statement of income or required to be disclosed in the notes to financial statements, and in some cases, include or exclude certain items not ordinarily included or excluded in the most comparable GAAP financial measure. In the opinion of the Company's management, a discussion of these measures provides investors with a better understanding of the significant factors that comprise the Company's periodic results of operations and how management evaluates the Company's financial performance.

Operating income (loss) is net income (loss) excluding the after-tax impact of net realized investment gains (losses). Operating income (loss) per share is operating income (loss) on a per share basis.

Return on equity is the ratio of net income to average equity. Operating return on equity is the ratio of operating income to average equity excluding net unrealized investment gains and losses, net of tax.

In the opinion of the Company's management, operating income, operating income per share and operating return on equity are meaningful indicators of underwriting and operating results. These measures exclude net realized investment gains or losses which can be significantly impacted by both discretionary and other economic factors and are not necessarily indicative of operating trends. Internally, the Company's management uses operating income, operating income per share and operating return on equity to evaluate performance against historical results and establish financial targets on a consolidated basis.

Underwriting gain (loss) is net earned premiums and fee income less claims and claim adjustment expenses and insurance-related expenses.

A **catastrophe** is a severe loss, resulting from natural and man-made events, including risks such as fire, earthquake, windstorm, explosion, terrorism and other similar events. Each catastrophe has unique characteristics, and catastrophes are not predictable as to timing or amount. Their effects are included in net and operating income and claims and claim adjustment expense reserves upon occurrence. A catastrophe may result in the payment of reinsurance reinstatement premiums and assessments from various pools. In the opinion of the Company's management, a discussion of the impact of catastrophes is meaningful for investors to understand variability in periodic earnings.

Loss reserve development is the increase or decrease in incurred claims and claim adjustment expenses as a result of the re-estimation of claims and claim adjustment expense reserves at successive valuation dates for a given group of claims. Loss reserve development may be related to one or more prior years or the current year. In the opinion of the Company's management, discussion of loss reserve development is useful to investors as it allows them to assess the impact between prior and current year development on incurred claims and claim adjustment expenses, net and operating income, and changes in claims and claim adjustment expense reserve levels from period to period.

GAAP combined ratio is the sum of the loss and loss adjustment expense ratio (loss and LAE ratio), the underwriting expense ratio and, where applicable, the ratio of dividends to policyholders to net premiums earned. For GAAP, the loss and LAE ratio is the ratio of incurred losses and loss adjustment expenses reduced by an allocation of fee income to net earned premiums. The underwriting expense ratio is the ratio of underwriting expenses incurred reduced by an allocation of fee income, and billing and policy fees to net earned premiums. A GAAP combined ratio under viniting loss. The GAAP combined ratio is an operating statistic that includes GAAP measures in the numerator and the denominator.

GAAP combined ratio excluding incremental impact of direct to consumer initiative is the GAAP combined ratio adjusted to exclude the direct, variable impact of the company's direct-to-consumer initiative in Personal Insurance. In the opinion of the company's management, this is useful in an analysis of the profitability of the company's ongoing agency auto business.

Gross written premiums reflect the direct and assumed contractually determined amounts charged to the policyholders for the effective period of the contract based on the terms and conditions of the insurance contract. Gross written premiums are a measure of overall business volume. Net written premiums reflect gross written premiums ceded to reinsurers.

Book value per share is total common shareholders' equity divided by the number of common shares outstanding. Adjusted book value per share is total common shareholders' equity excluding the after-tax impact of net unrealized investment gains and losses (i.e., excluding FAS 115), divided by the number of common shares outstanding. In the opinion of the Company's management, adjusted book value is useful in an analysis of a property casualty company's book value as it removes the effect of changing prices on invested assets, (i.e., net unrealized investment gains (losses), net of tax) which do not have an equivalent impact on unpaid claims and claim adjustment expense reserves.

Debt to capital is debt divided by shareholders' equity excluding the after-tax impact of net unrealized investment gains and losses (i.e., excluding FAS 115). In the opinion of the company's management, the debt to capital ratio is useful in an analysis of the company's leverage.

Travelers has organized its businesses into the following reportable business segments:

Business Insurance - The Business Insurance segment offers a broad array of property and casualty insurance and insurance-related services to its clients primarily in the United States. Business Insurance is organized into the following six groups, which collectively comprise Business Insurance Core operations: Select Accounts; Commercial Accounts; Industry-Focused Underwriting including Construction, Technology, Public Sector Services, Oil & Gas, Aviation, and Agribusiness; Target Risk Underwriting including National Property, Inland Marine, Ocean Marine, Excess Casualty, Boiler & Machinery, and Global Accounts; and Specialized Distribution including Northland and National Programs. Business Insurance also includes the Special Liability Group (which manages the Company's asbestos and environmental liabilities) and the assumed reinsurance, healthcare and certain international and other runoff operations, which collectively are referred to as Business Insurance Other.

Financial, Professional & International Insurance - The Financial, Professional & International Insurance segment includes surety and financial liability coverages, which require a primarily credit-based underwriting process, as well as property and casualty products that are primarily marketed on a domestic basis in the United Kingdom, Ireland and Canada, and on an international basis through Lloyd's. The businesses in Financial, Professional & International Insurance are Bond & Financial Products and International.

Personal Insurance - The Personal Insurance segment writes virtually all types of property and casualty insurance covering personal risks. The primary coverages in this segment are personal automobile and homeowners insurance sold to individuals.
