NOTES TO FINANCIAL STATEMENTS

Note 1 - Summary of Significant Accounting Policies

A. Accounting Practices:

The Standard Fire Insurance Company (the Company) prepares its statutory financial statements in conformity with accounting practices prescribed or permitted by the State of Connecticut. The State of Connecticut requires that insurance companies domiciled in Connecticut prepare their statutory basis financial statements in accordance with the National Association of Insurance Commissioners (NAIC) *Accounting Practices and Procedures Manual*, subject to any deviations prescribed or permitted by the Connecticut Insurance Commissioner. The Company has not applied for and does not believe that it employs any statutory accounting practices that would be considered a permitted practice in its financial statements.

B. Use of Estimates in the Preparation of the Financial Statements:

No significant change.

C. Accounting Policy:

No significant change.

Note 2 - Accounting Changes and Corrections of Errors

- A. 1. The Company adopted SSAP No. 101, *Income Taxes, A Replacement of SSAP No. 10R and SSAP No. 10* (SSAP No. 101) effective January 1, 2012. SSAP No. 101 revises the guidance for current and deferred federal and foreign income taxes. The new guidance limits the admissibility of deferred tax assets (DTAs) based on an insurer's RBC and the ratio of its adjusted DTAs to adjusted capital and surplus. The guidance also rejects the GAAP guidance from Financial Interpretation No. 48: *Accounting for Uncertainty in Income Taxes, an interpretation of FASB Statement No. 109 (ASC 740 in codification)* and instead modifies SSAP No. 5R, *Liabilities, Contingencies and Impairments of Assets – Revised*, requiring that a "more likely than not" rather than a "probable" standard to be applied in determining federal and foreign income tax loss contingencies.

At adoption, the Company recorded a cumulative effect adjustment that resulted in an increase in its liability for current tax liabilities of \$1,298,194, and a corresponding decrease in unassigned funds (surplus) in accordance with SSAP No. 3, *Accounting Changes and Corrections of Errors*.

2. During the first quarter 2012, an error in the reporting for "Uncollected premiums and agents' balances in course of collection" and "Payable to parent, subsidiaries and affiliates" was detected. The error impacted the balance sheet only, resulting in an understated amount reported in agents' balances, offset by an overstated due from affiliates. In accordance with SSAP No. 3, *Accounting Changes and Corrections of Errors*, the Company corrected this error in the March 31, 2012 statutory financial statement.

The error correction resulted in an additional \$2,514,135 reported in agents' balances in course of collection and payable to parent, subsidiaries and affiliates and did not impact net income or statutory surplus.

D. Loan-Backed Securities:

The Company applies the retrospective method of revaluing loan-backed securities. The Company's loan-backed securities are revalued quarterly using actual and currently estimated future cash flows, including anticipated prepayments, with the original cost. For those securities where an other-than-temporary impairment has been recognized, the prospective method is utilized.

For collateralized mortgage obligations, asset-backed securities and pass-through certificates prepayment assumptions are adjusted periodically.

When unit prices published by the SVO were not available, the Company uses Interactive Data, as well as broker quotes in determining the fair value of its loan-backed securities.

The Company determines an other-than-temporary impairment by utilizing discounted cash flow modeling to determine the present value of the security and comparing the present value with the amortized cost of the security. If the amortized cost is greater than the present value of the expected cash flows, the difference is considered a credit loss and recognized in net realized investment gains (losses). The Company estimates the present value of the security by projecting future cash flows of the assets underlying the securitization, allocating the flows to the various tranches based on the structure of the securitization, and determining the present value of the cash flows using the effective yield of the security at the date of acquisition (or the most recent implied rate used to accrete the security if the implied rate has changed as a result of a previous impairment or changes in expected cash flows). The Company incorporates levels of delinquencies, defaults and severities as well as credit attributes of the remaining assets in the securitization, along with other economic data, to arrive at its best estimate of the parameters applied to the assets underlying the securitization.

For the nine months ending September 30, 2012, the Company had no securities which changed from the retrospective to prospective valuation method.

Note 20 – Fair Value Measurements

The estimates of fair value for financial assets are based on the framework established in the fair value accounting guidance. The framework is based on the inputs used in valuation, gives the highest priority to quoted prices in active markets, and requires that observable inputs be used in the valuations when available. The disclosure of fair value estimates in the fair value accounting guidance hierarchy is based on whether the significant inputs into the valuation are observable. In determining the level of the hierarchy in which the estimate is disclosed, the highest priority is given to unadjusted quoted prices in active markets and the lowest priority to unobservable inputs that reflect the Company's significant market assumptions. The three levels of the hierarchy are as follows:

- Level 1 - Unadjusted quoted market prices for identical assets or liabilities in active markets that the Company has the ability to access.
- Level 2 - Quoted prices for similar assets or liabilities in active markets; quoted prices for identical or similar assets or liabilities in inactive markets; or valuations based on models where the significant inputs are observable (e.g., interest rates, yield curves, prepayment speeds, default rates, loss severities, etc.) or can be corroborated by observable market data.
- Level 3 - Valuations based on models where significant inputs are not observable. The unobservable inputs reflect the Company's own assumptions about the inputs that market participants would use.

A.(1) Assets measured and reported at fair value as of September 30, 2012:

Description	Level 1	Level 2	Level 3	Total
Bonds				
Industrial and miscellaneous	\$ -	1,220,097	15,038,306	\$ 16,258,403
Preferred stock				
Non-redeemable preferred stock	647,741	-	-	647,741
Common stock	2,044	-	-	2,044
Total assets at fair value	\$ 649,785	1,220,097	15,038,306	\$ 16,908,188

There were no significant transfers between level 1 and level 2.

(2) Assets measured and reported at fair value using significant unobservable inputs (level 3):

	Balance at 06/30/12	Transfers in level 3	Transfers out level 3	Total gains and (losses) included in net income	Total gains and (losses) included in surplus	Purchases and Issuances	Sales and Settlements	Balance at 09/30/12
Bonds	\$ 39,141,056	-	(24,242,101)	1,745	181,357	-	(43,751)	\$ 15,038,306
Total	\$ 39,141,056	-	(24,242,101)	1,745	181,357	-	(43,751)	\$ 15,038,306

(3) In accordance with SSAP No. 26, securities rated 3 or lower by the NAIC are carried at the lower of amortized cost or fair value. With fluctuations in the market value, the method of valuation may change from amortized cost to fair value or vice versa. These changes in the valuation method are captured in the transfers in or out of the level 3 hierarchy.

(4) Bonds and preferred stocks were carried at fair value under the lower of cost or market requirement. These securities were generally priced by the SVO or by a third party organization.

(5) Not applicable.

Note 22 – Events Subsequent

Type II – Non-recognized Subsequent Events

Subsequent Events have been considered through November 12 for the Quarterly Statement issued on November 13, 2012.

The Company has incurred losses as a result of Storm Sandy which on October 29 and 30 caused considerable damage along the U.S. East Coast, primarily impacting the Mid-Atlantic and Northeast states. Due to the fact that Storm Sandy is very recent, the extended period of restoration, and inaccessibility of many areas affected by the storm, the Company does not yet have a reliable estimate of storm losses but expects that the losses may be material to the Company's 2012 net income, but not the Company's surplus as regards policyholders.

Note 23 - Reinsurance

No significant change.

Note 24 – Retrospectively Rated Contracts & Contracts Subject to Redetermination

Note 25 – Change in Incurred Losses and Loss Adjustment Expenses

During the period from January 1, 2012 to September 30, 2012, the prior year-end total loss and loss adjustment expense reserves developed favorably by \$27,419,000, resulting from better than expected loss and DCC development primarily in the special property, other liability – occurrence, workers' compensation, homeowners, automobile physical damage, and other liability – claims made lines, and from lower estimates for adjusting and other expenses, partially offset by loss and DCC deterioration primarily in the products liability – occurrence, commercial automobile liability, and personal automobile liability lines.

The improvement in the special property line was concentrated in accident year 2011, driven by better than expected development for catastrophe and non-catastrophe weather-related claims, in accident years 2008 – 2010, reflecting higher than expected salvage and subrogation recoveries, and in accident year 2005, resulting from favorable claim resolutions. The improvement in the other liability – occurrence line was concentrated in the excess coverages for accident years 2002 - 2010 and reflected more favorable legal and judicial environments than the Company expected. Also contributing to the improvement was a reclassification of IBNR to products liability – occurrence. This improvement was partially offset by unfavorable development in asbestos and environmental reserves for "Prior" accident years. The improvement in the workers' compensation line was concentrated in accident years 2008 and prior, and reflected better than expected frequency and severity of lifetime medical claims, higher than expected managed care savings, and better than expected development. The improvement in the homeowners line was concentrated in accident year 2011, driven by better than expected development for catastrophe and non-catastrophe weather-related claims, and in accident years 2008 – 2010, reflecting higher than expected salvage and subrogation recoveries. The improvement in the automobile physical damage line was concentrated in accident years 2007 – 2011, driven by better than expected development for weather-related claims in accident year 2011, and by better than expected salvage and subrogation recoveries for accident years 2007 – 2010. The improvement in the other liability – claims made line was concentrated in accident years 2009 and prior, reflecting more favorable legal and judicial environments than the Company expected, partially offset by unfavorable development for accident year 2010. Lastly, the improvement in adjusting and other expense reserves was driven by improvement in the underlying loss and DCC reserves and by the allocation of adjusting and other expense reserves by year as disclosed in the Schedule P Interrogatories of the Company.

The deterioration in the products liability – occurrence line was primarily caused by unfavorable development in asbestos reserves and by a reclassification of IBNR from the other liability – occurrence line. The deterioration in the commercial automobile liability line was driven by worse than expected frequency for the 2011 accident year as well as higher than expected bodily injury severity for accident years 2010 and 2011. The private passenger automobile liability line also developed unfavorably for accident year 2011, driven by higher than expected bodily injury severity. The combined deterioration in automobile liability accounted for almost all of the overall unfavorable loss and DCC development for accident year 2011, which was partially offset by favorable adjusting and other expense reserve development.

The remaining changes are generally the result of ongoing analyses of recent loss data and trends. A portion of the change from prior year effects relates to retrospectively rated policies, and these policies are subject to premium adjustments.
