NOTES TO FINANCIAL STATEMENTS**1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES**

- A. Travelers Casualty and Surety Company (the Company) prepares its statutory financial statements in conformity with accounting practices prescribed or permitted by the State of Connecticut. The State of Connecticut requires that insurance companies domiciled in Connecticut prepare their statutory basis financial statements in accordance with the National Association of Insurance Commissioners (NAIC) *Accounting Practices and Procedures Manual*, subject to any deviations prescribed or permitted by the Connecticut Insurance Commissioner. The Company has not applied for and does not believe that it employs any statutory accounting practices that would be considered a permitted practice in its financial statements.
- B. The preparation of financial statements requires management to make estimates and assumptions that affect the reported amounts of certain assets and liabilities and disclosure of contingent liabilities at the date of the financial statements and the reported amounts of revenue and losses and expenses during the reporting period. Actual results could differ from those estimates.
- C. Certain assets designated as nonadmitted are excluded from the statutory balance sheet and changes in such amounts are charged or credited directly to unassigned surplus. The costs of acquiring both new and renewal insurance business are charged to income as incurred. Premiums are recognized as revenues pro rata over the policy period. Unearned premium reserves represent the unexpired portion of policy premiums, net of reinsurance. Reserves for losses, loss adjustment expenses (LAE) and unearned premiums ceded to reinsurers have been reported as reductions of the related reserves. Amounts recoverable from reinsurers are estimated in a manner consistent with the loss liability associated with the reinsured business. A liability is established for unsecured, unauthorized reinsurance and overdue authorized reinsurance recoverables. Goodwill is recognized in accordance with SSAP No. 68, *Business Combinations and Goodwill*, and amortized to unrealized capital losses over a period not to exceed 10 years.

The provision for federal income taxes is comprised of two components, current income taxes and deferred income taxes. Deferred federal income taxes arise from changes during the year in cumulative temporary differences between the statutory basis and tax basis of assets and liabilities. The Company adopted Statement of Statutory Accounting Principles (SSAP) No. 101, *Income Taxes, A Replacement of SSAP No. 10R and SSAP No. 10* (SSAP No. 101), effective January 1, 2012. For a discussion of this accounting change see Note 2.

Invested assets are valued according to statutory requirements and the bases of valuation adopted by the NAIC.

Short-term investments are stated at amortized cost and consist of investments with remaining maturities of one year or less at the time of acquisition, excluding those investments classified as cash equivalents.

Bonds are generally stated at amortized cost, except bonds that are defined by the NAIC as non-investment grade (NAIC Class 3-6) which are stated at the lower of amortized cost or NAIC fair value. Amortization is calculated using the constant yield method.

Common stocks of non-affiliates are stated at NAIC fair value.

Redeemable preferred stocks (NAIC Class 1 and 2) are generally stated at amortized cost, whereas NAIC Class 3-6 are stated at the lower of cost, amortized cost, or NAIC fair value. Perpetual preferred stocks (NAIC Class 1 and 2) are generally stated at NAIC fair value, while NAIC Class 3-6 are stated at the lower of cost or NAIC fair value.

Mortgage loans are stated at the amount of principal outstanding, adjusted for unamortized premium or discount, net of encumbrances and specific impairments.

Loan-backed and structured securities are amortized using the retrospective method, except for securities that have incurred a decline in fair value that is other than temporary are amortized using the prospective method. The effective yield used to determine amortization is calculated based on actual historical and projected future cash flows, which are obtained from a nationally recognized securities data provider.

Investments in subsidiaries and affiliated entities are based on the net worth of the entity, determined in accordance with statutory accounting valuation methods. Dividends received from subsidiaries are recorded as net investment income and undistributed net income is recorded as net unrealized capital gains (losses).

The Company also exercises 100% control over Travelers Lloyds of Texas Insurance Company, an unincorporated association, reported on Schedule BA based on the underlying statutory equity of its financial statements.

The Company's investments in partnerships, joint ventures and limited liability companies are reported using the equity method of accounting, determined in accordance with statutory accounting valuation methods. Distributions of accumulated earnings received from these investments are recorded as net investment income and undistributed net income is recorded as net unrealized capital gains (losses).

For accounting policy in regards to derivative instruments, see Note 8.

The Company utilizes anticipated investment income as a factor in the premium deficiency calculation.

Property-casualty reserves are established for loss and LAE and represent management's estimate of the ultimate cost of all unpaid reported and unreported claims incurred and related expenses. In establishing loss and LAE reserves, the Company also takes into account estimated recoveries, reinsurance, salvage and subrogation. The loss and LAE reserves are reviewed regularly by qualified actuaries employed by the Company. The Company continually refines its loss and LAE reserve estimates in a regular ongoing process as historical loss experience develops and additional claims are reported and settled. Because establishment of loss and LAE reserves is an inherently uncertain process involving estimates, currently established reserves may change. The Company reflects adjustments to loss and LAE reserves in the period in which the estimates are changed. Such changes in estimates could occur in a future period and may be material to the Company's net income in such period. For a discussion of loss and LAE reserves related to asbestos and environmental reserves, see Note 33.

The Company has not modified its accounting policy regarding the capitalization of fixed assets from the prior period.

2. ACCOUNTING CHANGES AND CORRECTIONS OF ERRORS

1. The Company adopted SSAP No. 101 effective January 1, 2012. SSAP No. 101 revises the guidance for current and deferred federal and foreign income taxes. The new guidance limits the admissibility of deferred tax assets (DTAs) based on an insurer's RBC and the ratio of its adjusted DTAs to adjusted capital and surplus. The guidance also rejects the GAAP guidance from Financial Interpretation No. 48: *Accounting for Uncertainty in Income Taxes, an interpretation of FASB Statement No. 109 (ASC 740 in codification)* and instead modifies SSAP No. 5R, *Liabilities, Contingencies and Impairments of Assets – Revised*, requiring that a "more likely than not" rather than a "probable" standard to be applied in determining federal and foreign income tax loss contingencies.

NOTES TO FINANCIAL STATEMENTS

At adoption, the Company reported a cumulative effect adjustment that resulted in an increase in its liability for current tax liabilities of \$5,537,402, and a corresponding decrease in unassigned funds in accordance with SSAP No. 3, *Accounting Changes and Corrections of Errors*.

- During the first quarter 2012, an error in the reporting for "Uncollected premiums and agents' balances in course of collection" and "Payable to parent, subsidiaries and affiliates" was detected. The error impacted the balance sheet only, resulting in an understated amount reported in agents' balances, offset by an overstated due from affiliates. In accordance with SSAP No. 3, *Accounting Changes and Corrections of Errors*, the Company corrected this error in the March 31, 2012 statutory financial statement.

The error correction resulted in an additional \$10,575,991 reported in agents' balances in course of collection and payable to parent, subsidiaries and affiliates and did not impact net income or surplus as regards policyholders (policyholders' surplus).

3. BUSINESS COMBINATIONS AND GOODWILL**A. Statutory Purchase Method:**

- On January 1, 2005, the Company purchased from its affiliate, the St. Paul Fire and Marine Insurance Company (Fire and Marine), 100% of the Travelers Insurance Company of Canada (Travelers Canada, formerly known as Travelers Guarantee Company of Canada), a Canadian insurance company.

In conjunction with this purchase, a formal filing was made with the Office of the Superintendent of Financial Institutions in Canada in order to amalgamate Travelers Canada and Travelers Casualty and Surety Company of Canada, a subsidiary of the Company. The effective date of the amalgamation was January 1, 2005 and Travelers Canada was the surviving company.

- The purchase of Travelers Canada was accounted for as a statutory purchase.
- The cost of Travelers Canada was \$135.0 million resulting in goodwill in the amount of \$41.7 million.
- Goodwill amortization relating to the purchase of Travelers Canada was \$4.2 million for the year ended December 31, 2012.

B. Statutory Merger:

Not applicable.

C. Impairment Loss:

Not applicable.

4. DISCONTINUED OPERATIONS

Not applicable.

5. INVESTMENTS**A. Mortgage Loans:**

The maximum percentage of any one loan-to-value of security at the time the loan was made, exclusive of any purchase money or insured or guaranteed mortgages was 83%.

B. Debt Restructuring:

Not applicable.

C. Reverse Mortgages:

Not applicable.

D. Loan-Backed Securities:

- The Company applies the retrospective method of revaluing loan-backed securities. The Company's loan-backed securities are revalued quarterly using the constant effective yield method which includes an adjustment for estimated principal repayments, if any. The effective yield used to determine amortization for these securities is recalculated and adjusted periodically based upon actual historical and/or projected future cash flows. The Company changes from the retrospective to prospective method for valuing the securities when an other-than-temporary impairment has been recorded.

For collateralized mortgage obligations, asset-backed securities and pass-through certificates prepayment assumptions are adjusted periodically.

When unit prices published by the Securities Valuation Office were not available, the Company uses Interactive Data, as well as broker quotes in determining the fair value of its loan-backed securities.

- The following table provides aggregated information on structured securities classified on the basis for the recognized other-than-temporary impairments:

	Amortized cost basis before other-than- temporary impairment	Other-than temporary impairment recognized in loss	Fair value

4. The gross unrealized investment losses and related fair value for impaired securities for which an other-than-temporary impairment has not been recognized as a realized loss were as follows:

a. The aggregate amount of unrealized losses:

1. Less than 12 Months	\$ 91,830
2. 12 Months or Longer	\$ 72,548

NOTES TO FINANCIAL STATEMENTS

b. The aggregate related fair values of securities with unrealized losses:	1. Less than 12 Months	\$24,190,709
	2. 12 Months or Longer	\$11,538,089

5. The Company determines an other-than-temporary impairment by utilizing discounted cash flow modeling to determine the present value of the security and comparing the present value with the amortized cost of the security. If the amortized cost is greater than the present value of the expected cash flows, the difference is considered a credit loss and recognized in net realized investment gains (losses). The Company estimates the present value of the security by projecting future cash flows of the assets underlying the securitization, allocating the flows to the various tranches based on the structure of the securitization, and determining the present value of the cash flows using the effective yield of the security at the date of acquisition (or the most recent implied rate used to accrete the security if the implied rate has changed as a result of a previous impairment or changes in expected cash flows). The Company incorporates levels of delinquencies, defaults and severities as well as credit attributes of the remaining assets in the securitization, along with other economic data, to arrive at its best estimate of the parameters applied to the assets underlying the securitization.

E. Repurchase Agreements and/or Securities Lending Transactions:

The Company requires collateral equal to at least 102% of the market value of the loaned security plus accrued interest. The Company accepts only cash as collateral for securities on loan and restricts the manner in which that cash is invested to U.S. Treasury securities and U.S. Treasury repurchase agreements.

6. JOINT VENTURES, PARTNERSHIPS AND LIMITED LIABILITY COMPANIES**A. Not applicable.**

- B. Joint ventures, partnerships, and limited liability companies are recorded on a lag basis with changes in the Company's proportional share of equity recorded as an unrealized gain (loss), subject to testing for possible impairment. As part of the impairment testing process, the Company evaluates those assets for other-than-temporary impairments using financial information that is received from the respective joint venture, partnership, or limited liability company. The Company concluded that some of the aforementioned assets, as a result of deteriorating economic conditions, had other-than-temporary impairments and recorded a realized loss of \$4,707,269 with an offsetting entry to change in net unrealized capital gains or (losses). There was no impact to policyholders' surplus as the change in net unrealized capital gains or (losses) was offset by the realized loss of the same amount.

7. INVESTMENT INCOME

- A. Policyholders' surplus excludes due and accrued investment income if amounts are over 180 days past due for mortgage loans and over 90 days past due for all other invested assets.

- B. At December 31, 2012, the Company had no accrued investment income over 90 days past due.

8. DERIVATIVE INSTRUMENTS

The Company uses U.S. Treasury note futures transactions to modify the effective duration of specific assets within the investment portfolio and enters into 90-day futures contracts on 5-year U.S. Treasury notes which require a daily mark-to-market and settlement with the counter-party/broker. See Schedule DB - Part B for additional information. The contract amount of futures contracts represents the extent of the Company's involvement, but not future cash requirements, as open positions are typically closed out prior to the delivery date of the contract. The Company does not hold or issue derivative instruments for trading purposes.

Premium tax offset applied	142,006

c. Increases current year:	
Premium tax offset accrued	<u>253,540</u>
d. Assets recognized from paid and accrued premium tax offsets December 31, 2012	<u>\$ 828,525</u>

C. Gain Contingencies:

On August 17, 2010, in a reinsurance dispute in New York state court captioned *United States Fidelity & Guaranty Company v. American Re-Insurance Company, et al.* (American Re), the trial court granted summary judgment for United States Fidelity & Guaranty Company (USF&G) and denied summary judgment for American Re and three other reinsurers. By order dated October 22, 2010, the trial court corrected certain clerical errors and made certain clarifications to the August 17, 2010 order. On October 25, 2010, judgment was entered against American Re and the other three insurers, awarding USF&G \$420 million, comprising \$251 million ceded under the terms of the disputed reinsurance contract plus interest of 9% amounting to \$169 million as of that date. The judgment, including the award of interest, was appealed by the reinsurers to the New York Supreme Court, Appellate Division, First Department. On January 24, 2012, the Appellate Division affirmed the judgment. On January 30, 2012, the reinsurers filed a motion with the Appellate Division seeking permission to appeal its decision to the New York Court of Appeals, and on March 12, 2012, the Appellate Division granted the reinsurers' motion. On February 7, 2013, the Court of Appeals issued an opinion that largely affirmed the summary judgment in USF&G's favor, while modifying in part the summary judgment with respect to two discrete issues and remanding the case to the trial court for determination of those issues. USF&G believes it has a meritorious position on each of these issues and intends to pursue its claim vigorously. At December 31, 2012, the claim totaled \$470 million, comprising the \$251 million of reinsurance recoverable plus interest which had grown to \$219 million as of that date. Interest will continue to accrue at 9% until the claim is paid.

NOTES TO FINANCIAL STATEMENTS

As USF&G is a participant in the Travelers Reinsurance Pool (TRV Pool), any amounts recoverable from this claim are subject to participation percentages of the TRV Pool (See Note 26). Accordingly, the Company's respective TRV Pool participation share of the \$251 million awarded by the court represents the amounts owed to and reported by the Company under the terms of the disputed reinsurance contract. The Company's respective Pool participation share of the interest that would be received as part of any judgment ultimately entered in favor of USF&G is treated for accounting purposes as a gain contingency in accordance with SSAP No. 5R, *Liabilities, Contingencies and Impairment of Assets - Revised*, and accordingly has not been recognized in the Company's statutory financial statements.

In an unrelated action, Indemnity is one of the Settlement Class plaintiffs and a class member in a class action lawsuit captioned *Safeco Insurance Company of America, et al. v. American International Group, Inc. et al.* (U.S. District Court, N.D. Ill.) in which the defendants are alleged to have engaged in the under-reporting of workers' compensation premium in connection with a workers' compensation reinsurance pool in which several members of the TRV Pool participate. On July 26, 2011, the court granted preliminary approval of a class settlement pursuant to which the defendants agreed to pay \$450 million to the class. The settlement includes a plan of allocation of the settlement proceeds among the class members. On December 21, 2011, the court entered an order granting final approval of the settlement, and on February 28, 2012, the district court issued a written opinion regarding its approval of the settlement. On March 27, 2012, three parties who objected to the settlement appealed the court's orders approving the settlement to the U.S. Court of Appeals for the Seventh Circuit. On January 11, 2013, all parties, including the three parties who had objected to the settlement, filed a Stipulation of Dismissal indicating that there were no longer any objections to the settlement. All parties are awaiting an order from the Seventh Circuit in response to the Stipulation of Dismissal. Indemnity anticipates that its allocation from the settlement fund, in the event the settlement becomes final, will be approximately \$90 million.

As Indemnity is a participant in the TRV Pool, its settlement amount is subject to participation percentages of the TRV Pool (See Note 26). Accordingly, the Company's respective TRV Pool participation share of the \$90 million to be awarded from the settlement is treated for accounting purposes as a gain contingency in accordance with SSAP No. 5R, *Liabilities, Contingencies and Impairment of Assets - Revised*, and accordingly will be recognized in the Company's financial statements during the period in which it is received.

A. Transfers of Receivables Reported as Sales:

Not applicable.

NOTES TO FINANCIAL STATEMENTS**B. Transfer and Servicing of Financial Assets:**

The Company engages in securities lending activities from which it generates net investment income from the lending of certain of its investments to other institutions for short periods of time. Borrowers of these securities provide collateral equal to at least 102% of the market value of the loaned securities plus accrued interest. This collateral is held by a third party custodian, and the Company has the right to access the collateral only in the event that the institution borrowing the Company's securities is in default under the lending agreement. The loaned securities remain a recorded asset of the Company. The Company accepts only cash as collateral for securities on loan and restricts the manner in which that cash is invested to U.S. Treasury securities and U.S. Treasury repurchase agreements. These securities typically have a duration of 1 day. See Schedule D – Part 1 for identification and description of securities on loan.

20. FAIR VALUE MEASUREMENTS

The estimates of fair value for financial assets are based on the framework established in the fair value accounting guidance. The framework is based on the inputs used in valuation, gives the highest priority to quoted prices in active markets, and requires that observable inputs be used in the valuations when available. The disclosure of fair value estimates in the fair value accounting guidance hierarchy is based on whether the significant inputs into the valuation are observable. In determining the level of the hierarchy in which the estimate is disclosed, the highest priority is given to unadjusted quoted prices in active markets and the lowest priority to unobservable inputs that reflect the Company's significant market assumptions. The three levels of the hierarchy are as follows:

- Level 1 - Unadjusted quoted market prices for identical assets or liabilities in active markets that the Company has the ability to access.
- Level 2 - Quoted prices for similar assets or liabilities in active markets; quoted prices for identical or similar assets or liabilities in inactive markets; or valuations based on models where the significant inputs are observable (e.g., interest rates, yield curves, prepayment speeds, default rates, loss severities, etc.) or can be corroborated by observable market data.
- Level 3 - Valuations based on models where significant inputs are not observable. The unobservable inputs reflect the Company's own assumptions about the inputs that market participants would use.

A. (1) Assets measured and reported at fair value as of December 31, 2012:

NOTES TO FINANCIAL STATEMENTS**E. Business Interruption Insurance Recoveries:**

F. State Transferable and Non-Transferable Tax Credits:

G. Subprime Mortgage Related Risk Exposure:

The Company defines subprime mortgage-backed securities as investments which generally contain a majority of loans to borrowers that exhibit one or more of the following characteristics at the time of issuance:

- Low FICO scores,
- Above prime interest rates,
- High loan-to-value ratios,
- High debt-to-income ratios,
- Low loan documentation (e.g. limited or no verification of income and assets), or
- Other characteristics that are inconsistent with conventional underwriting standards employed by government sponsored mortgage entities.

In addition, because of their high loan-to-value ratios, the Company has categorized second-lien mortgage-backed securities as subprime, regardless of the credit characteristics of the borrower on the underlying mortgage.

The Company reviews the credit characteristics of the loans that back these mortgage-backed securities when making the determination to categorize them as subprime exposure. Since the primary purpose of the investment portfolio is to fund future claim payments, the Company employs a conservative investment philosophy. In applying this philosophy to structured securities, including subprime mortgage-backed securities, the Company favors the purchase of senior credit tranches over junior or leveraged credit tranches.

Overall exposure to subprime mortgage-backed securities is sufficiently small in that the Company would likely have other securities available for liquidity needs. The Company utilizes discounted cash flow valuation analysis in its regular, ongoing review of its existing subprime mortgage portfolio, as well as in its analysis of subprime mortgage-backed bonds for purchase. Based upon the credit performance of mortgages within each securitization, the Company projects voluntary prepayments, defaults and loss severity to estimate any expected losses.

Direct exposure through other investments:

	Actual Cost	Book/Adjusted Carrying Value (excluding interest)	Fair Value	Other Than Temporary Impairment Losses Recognized
Residential mortgage-backed securities:	\$ 74,173,800	\$ 73,957,699	\$ 82,535,959	\$ 23,662,187

25. CHANGES IN INCURRED LOSSES AND LOSS ADJUSTMENT EXPENSES

During the period from January 1, 2012 to December 31, 2012, the prior year-end total loss and loss adjustment expense reserves developed favorably by \$160,682,000, resulting from better than expected loss and defense and cost containment (DCC) development primarily in the workers' compensation, special property, other liability – occurrence, reinsurance – liability, homeowners, and automobile physical damage lines, and from lower estimates for adjusting and other expenses, partially offset by loss and DCC deterioration primarily in the commercial automobile liability, products liability – occurrence, and private passenger automobile liability lines.

The improvement in the workers' compensation line was concentrated in accident years 2008 and prior, and reflected better than expected frequency and severity of lifetime medical claims. The improvement in the special property line was driven by better than expected development for catastrophe claims incurred in accident year 2011, and by higher than expected salvage and subrogation recoveries in accident years 2009 through 2011. The improvement in the other liability – occurrence line was concentrated in the excess coverages for accident years 2003 through 2010 and reflected more favorable legal and judicial environments than what the Company previously expected. Also contributing to the improvement was a reallocation of IBNR to products liability – occurrence. This improvement was partially offset by unfavorable development in asbestos and environmental reserves for "Prior" accident years. The improvement in the reinsurance - liability line was driven by a reallocation of IBNR to other liability – claims made line for accident years 2008 through 2011 and by favorable resolutions of claims and disputes from accident years 2004 and prior, partially offset by an increase in projected assumed asbestos liability payments. The improvement in the homeowners line was driven by better than expected development for catastrophe claims incurred in accident year 2011 and non-catastrophe claims incurred in accident years 2010 and 2011. The improvement in the automobile physical damage line was driven by better than expected development for weather-related claims in accident year 2011. Lastly, the improvement in adjusting and other expense reserves was driven by improvement in the underlying loss and DCC reserves and by the allocation of adjusting and other expense reserves by year as disclosed in the Schedule P Interrogatories of the Company.

The deterioration in the commercial automobile liability line was driven by higher than expected bodily injury severity for accident years 2010 and 2011. The deterioration in the products liability – occurrence line was primarily caused by unfavorable development in asbestos reserves and by a reallocation of IBNR from the other liability – occurrence line. Lastly, the deterioration in the private passenger automobile liability line was driven by higher than expected bodily injury severity for accident year 2011.

The remaining changes are generally the result of ongoing analyses of recent loss data and trends. A portion of the change from prior year effects relates to retrospectively rated policies, and these policies are subject to premium adjustments.

26. INTERCOMPANY POOLING ARRANGEMENTS

The Company is a participant in the TRV Pool, an intercompany pooling arrangement. The lead company of the TRV Pool is Indemnity. Under the terms of the arrangement, the property-casualty underwriting risks for substantially all lines of business of the intercompany pool participants are reinsured with Indemnity. The pool of net underwriting risks remaining after reinsurance is transacted with third parties by Indemnity is then retroceded to the pool participants based on pool participation percentages. The provision for reinsurance and the write-off of uncollectible reinsurance are reported in the statutory financial statements of Indemnity and are not allocated to the other pool participants.

NOTES TO FINANCIAL STATEMENTS

All of the above TRV Pool companies are party to reinsurance agreements with non-affiliated reinsurers covering business subject to the pooling agreement and have contractual rights of direct recovery from the non-affiliated reinsurers under the terms of such reinsurance agreements.

As of December 31, 2012 the Company had \$26,190,031 payable to affiliates as a result of its intercompany reinsurance transactions which settled in January 2013.

27. STRUCTURED SETTLEMENTS

The Company has purchased annuities from life insurance companies, under which the claimant is the payee and the Company is the owner of the annuity contract, to fund structured settlements. These annuity contracts are now the direct responsibility of the life insurance companies from whom they have been purchased and claims settled by the purchase of such annuity contracts are treated as closed claims. In the event that the life insurance company fails to make the required annuity payments, the Company would be required to make such payments if and to the extent not paid by state guaranty associations.

The following data represents the Company's proportionate share of structured settlement annuities purchased by members of the TRV Pool (see Note 26):

These amounts represent the Company's proportionate share of the TRV Pool (see Note 26).

32. DISCOUNTING OF LIABILITIES FOR UNPAID LOSSES OR UNPAID LOSS ADJUSTMENT EXPENSES

A. Except for certain third party administered claims, tabular workers' compensation case reserves have been discounted in accordance with the various state laws under which the benefits are paid. The tabular case reserves, as included in Schedule P, reflect a discount rate of 3.5% or as specified by state requirements, generally using the following United States Life Tables:

Non-Fatal Cases:	United States Life Tables Total Population 1969-71 – MI United States Life Tables Total Population 1979-81 – TX United States Life Tables Total Population 1999 – FL, NJ & NY United States Life Tables Total Male or Total Female 1989-91 – CA United States Life Tables Total Male or Total Female 2006 – MA United States Life Tables Total Male or Total Female 2000 – MN United States Life Tables Total Male or Total Female 1999 – all other states

Other liability reserves related to annuity obligations from structured settlements are discounted using a discount rate of 5% and reflect the 1983 Individual Annuity Mortality table adjusted for impairment and future mortality improvement.

The Company develops loss reserve estimates for workers' compensation tabular claims that are expectations of what the ultimate settlement costs for these claims will be upon final resolution in the future. These estimates are based on the Company's assessment of facts and circumstances currently known and, using Company experience, multiple actuarial estimation methods. This includes estimates of payment patterns reflecting actual mortality, morbidity and settlement history that relate both to claims currently identified as tabular as well as claims not yet identified as tabular ("IBNR" tabular). The total reserves and the corresponding discount that the Company has established for these claims reflects these multiple estimation methods, payment patterns and a discount rate of 5%. The liabilities and discount amounts shown below reflect estimates of the ultimate liability for tabular claims. Furthermore, the case vs. IBNR discount amounts shown below each reflects estimates of the ultimate resolution costs for these claims: case amounts for claims already identified as tabular; IBNR amounts for claims yet to be identified as tabular.

NOTES TO FINANCIAL STATEMENTS

The December 31, 2012 liabilities of the Company included \$332,101,313 and \$25,448,861 of such discounted liabilities related to workers' compensation and other liability-occurrence reserves, respectively. The amount of discount for case and IBNR reserves at December 31, 2012 is as follows:

Tabular Discount

	<u>Schedule P Lines of Business</u>	<u>Tabular Discount Included in Schedule P, Part 1*</u>

B. Non-tabular reserves have not been discounted.

C. No changes in the rates or other key assumptions used to discount prior accident year reserves have been made.

33. ASBESTOS/ENVIRONMENTAL RESERVES

The following represents the Company's allocable share of the pooled property-casualty business of the TRV Pool, based on its pro rata participation percentage of 20.36%.

A. Does the Company have on the books or has it ever written an insured for which you have identified a potential for the existence of a liability due to asbestos losses? Yes (X) No ()

Exposure for asbestos losses arises from liability coverage written many years ago. The exposures include bodily injury and property damage losses.

Because each policyholder presents different liability and coverage issues, the Company generally reviews the exposure presented by each policyholder at least annually. Among the factors which the Company may consider in the course of this review are: available insurance coverage, including the role of any umbrella or excess insurance the Company has issued to the policyholder; limits and deductibles; an analysis of the policyholder's potential liability; the jurisdictions involved; past and anticipated future claim activity and loss development on pending claims; past settlement values of similar claims; allocated claim adjustment expense; potential role of other insurance; the role, if any, of non-asbestos claims or potential non-asbestos claims in any resolution process; and applicable coverage defenses or determinations, if any, including the determination as to whether or not an asbestos claim is a products/completed operation claim subject to an aggregate limit and the available coverage, if any, for that claim.

The Company continues to be involved in coverage litigation concerning a number of policyholders, some of whom have filed for bankruptcy, who in some instances have asserted that all or a portion of their asbestos-related claims are not subjected to aggregate limits on coverage. In these instances, policyholders also may assert that each individual bodily injury claim should be treated as a separate occurrence under the policy. It is difficult to predict whether these policyholders will be successful on both issues. To the extent both issues are resolved in a policyholder's favor and other Company defenses are not successful, the Company's coverage obligations under the policies at issue would be materially increased and bounded only by the applicable per-occurrence limits and the number of asbestos bodily injury claims against the policyholders. Accordingly, although the Company has seen a moderation in the overall risk associated with these lawsuits, it remains difficult to predict the ultimate cost of these claims.

The Company's quarterly asbestos reserve reviews include an analysis of exposure and claim payment patterns, as well as recent settlements, policyholder bankruptcies, judicial rulings and legislative actions. The Company also analyzes developing payment patterns among various policyholders as well as projected reinsurance billings and recoveries. In addition, the Company reviews its historical gross and net loss and expense paid experience, year-by-year, to assess any emerging trends, fluctuations, or characteristics suggested by the aggregate paid activity. Conventional actuarial methods are not utilized to establish asbestos reserves nor have the Company's evaluations resulted in any way of determining a meaningful average asbestos defense or indemnity payment.

In December 2008, the Company's affiliate, St. Paul Fire and Marine Insurance Company (Fire and Marine) sold Unionamerica. In conjunction with the sale Fire and Marine commuted its assumed intercompany reinsurance agreements with Unionamerica subsidiaries. As a result of these commutations and their impact on the TRV Pool, the Company's 2008 asbestos assumed calendar year paid losses increased by \$40,312,800 and the Company's 2008 asbestos assumed incurred losses decreased by \$6,922,400.

D. Does the Company have on the books or has it ever written an insured for which you have identified a potential for the existence of a liability due to environmental losses? Yes (X) No ()

Exposure for environmental losses arises from liability coverage written many years ago. The exposures include bodily injury and property damage losses.

The resolution of environmental exposures by the Company generally occurs through settlements with policyholders as opposed to claimants. Generally, the Company strives to extinguish any obligations it may have under any policy issued to the policyholder for past, present and future environmental liabilities and extinguish any pending coverage litigation dispute with the policyholder. This form of settlement is commonly referred to as a "buy-back" of policies for future environmental liability. In addition, many of the agreements have also extinguished any insurance obligation which the Company may have for other claims, including but not limited to asbestos and other cumulative injury claims. The Company and its policyholders may also agree to settlements which extinguish any liability arising from known specified sites or claims. Where appropriate, these agreements also include indemnities and hold harmless provisions to protect the Company. The Company's general purpose in executing these agreements is to reduce the Company's potential environmental exposure and eliminate the risks presented by coverage litigation with the policyholder and related costs.

In establishing environmental reserves, the Company evaluates the exposure presented by each policyholder and the anticipated cost of resolution, if any. In the course of this analysis, the Company generally considers the probable liability, available coverage, relevant judicial interpretations and historical value of similar exposures. In addition, the Company considers the many variables presented, such as the nature of the alleged activities of the policyholder at each site; the number of sites; the total number of potentially responsible parties at each site; the nature of the alleged environmental harm and the corresponding remedy at each site; the nature of government enforcement activities at each site; the ownership and general use of each site; the overall nature of the insurance relationship between the Company and the policyholder, including the role of any umbrella or excess insurance the Company has issued to the policyholder; the involvement of other insurers; the potential for other available coverage, including the number of years of coverage; the role, if any, of non-environmental claims or potential non-environmental claims in any resolution process; and the applicable law in each jurisdiction. The evaluation of the exposure presented by a policyholder can change as information concerning that policyholder and the many variables presented is developed. Conventional actuarial techniques are not used to estimate these reserves.

In its review of environmental reserves, the Company considers: past settlement payments; changing judicial and legislative trends; its reserves for the costs of litigating environmental coverage matters; the potential for policyholders with smaller exposures to be named in new clean-up actions for both on- and off-site waste disposal activities; the potential for adverse development; the potential for additional new claims beyond previous expectations; and the potential higher costs for new settlements.

The majority of the net environmental reserve is carried in a bulk reserve which includes unresolved environmental claims, incurred but not reported environmental claims and the anticipated cost of coverage litigation disputes relating to these claims. The bulk reserve the Company carries is established and adjusted based upon the aggregate volume of in-process environmental claims and the Company's experience in resolving those claims. The balance of the net environmental reserve consists of case reserves.

As a result of the commutations described above and their impact on the TRV Pool, the Company's 2008 environmental assumed calendar year paid losses increased by \$5,700,800 and the Company's 2008 environmental assumed incurred losses decreased by \$1,018,000.

As a result of the processes and procedures discussed above, management believes that the reserves carried for asbestos and environmental claims at December 31, 2012 are appropriately established based upon known facts, current law and management's

NOTES TO FINANCIAL STATEMENTS

judgment. However, the uncertainties surrounding the final resolution of these claims continue, and it is difficult to determine the ultimate exposure for asbestos and environmental claims and related litigation. As a result, these reserves are subject to revision as new information becomes available and as claims develop. The continuing uncertainties include, without limitation, the risks and lack of predictability inherent in complex litigation, any impact from the bankruptcy protection sought by various asbestos producers and other asbestos defendants, a further increase or decrease in the cost to resolve and/or the number of asbestos and environmental claims beyond that which is anticipated, the role of any umbrella or excess policies the Company has issued, the resolution or adjudication of disputes pertaining to the amount of available coverage for asbestos and environmental claims in a manner inconsistent with the Company's previous assessment of these claims, the number and outcome of direct actions against the Company, future developments pertaining to the Company's ability to recover reinsurance for asbestos and environmental claims and the unavailability of other insurance sources potentially available to policyholders, whether through exhaustion of policy limits or through the insolvency of other participating insurers. In addition, uncertainties arise from the insolvency or bankruptcy of policyholders and other defendants. It is also not possible to predict changes in the legal, regulatory and legislative environment and their impact on the future development of asbestos and environmental claims. This environment could be affected by changes in applicable legislation and future court and regulatory decisions and interpretations, including the outcome of legal challenges to legislative and/or judicial reforms establishing medical criteria for the pursuit of asbestos claims. It is also difficult to predict the ultimate outcome of complex coverage disputes until settlement negotiations near completion and significant legal questions are resolved or, failing settlement, until the dispute is adjudicated. This is particularly the case with policyholders in bankruptcy where negotiations often involve a large number of claimants and other parties and require court approval to be effective. As part of its continuing analysis of asbestos and environmental reserves, the Company continues to study the implications of these and other developments.

Because of the uncertainties set forth above, additional liabilities may arise for amounts in excess of the current related reserves. In addition, the Company's estimate of claims and claim adjustment expenses may change. These additional liabilities or increases in estimates, or a range of either, cannot now be reasonably estimated and could result in income statement charges that could be material to the Company's operating results in future periods.

36. FINANCIAL GUARANTY INSURANCE

In prior years, the Company underwrote insurance guaranteeing the securities of other issuers, primarily corporate bond issuers. The Company no longer writes such guarantees. At December 31, 2012 and 2011, the Company's aggregate net amount of guarantees of principal and interest for such securities was approximately \$0.5 million.

Also in past years, the Company underwrote financial guarantee insurance representing the Company's participation in the Municipal Bond Insurance Association's (MBIA) guarantee of municipal bond obligations. The Company has no net exposure for the guarantee of principal and interest for such securities as the Company's participation in MBIA has been reinsured. The gross amounts of such financial guarantees was \$32.5 million and \$56.2 million at December 31, 2012 and 2011 respectively.

6.1 What provision has this reporting entity made to protect itself from an excessive loss in the event of a catastrophe under a workers' compensation contract issued without limit of loss?

The Company's risk management practices include active monitoring of insured employee local-based concentrations. Although the Company currently has no significant workers' compensation treaty reinsurance, the Company reviews available treaty reinsurance coverages periodically and makes purchase decisions as it deems appropriate. Facultative reinsurance purchases are also made as deemed appropriate.

6.2 Describe the method used to estimate this reporting entity's probable maximum insurance loss, and identify the type of insured exposures comprising that probable maximum loss, the locations of concentrations of those exposures and the external resources (such as consulting firms or computer software models), if any, used in the estimation process:

The Company uses various analyses and methods, including proprietary and third party computer modeling processes, to analyze catastrophic events and the associated risks to arrive at loss estimates. The Company uses these analyses and methods to make underwriting and reinsurance decisions designed to manage its exposure to catastrophic events. The Company's hurricane loss estimates reflect U.S. exposures and include property exposures, property residual market exposures and an adjustment for certain non-property exposures. The Company's loss estimates are based on the Company's catastrophe risk model estimates and include loss from the hurricane hazards of wind and storm surge. The Company's loss estimates for earthquakes reflect U.S. and Canadian exposures and include property exposures and workers' compensation exposures. The Company's loss estimates for terrorism reflect U.S. exposures and include property exposures. The Company also develops conventional attack loss estimates for combined property and workers' compensation exposures for comparison and adherence with aggregate enterprise guidelines. To best assess risk, the Company conducts site engineering analyses on buildings with large exposures. Property exposures are analyzed to determine locations of concentration. Spanning the U.S., this includes California, Florida, New Madrid, the Northeast, the Gulf States, and the Mid-Atlantic States.

6.3 What provision has this reporting entity made (such as a catastrophic reinsurance program) to protect itself from an excessive loss arising from the types and concentrations of insured exposures comprising its probable maximum property insurance loss?

The Company purchases both excess of loss and proportional reinsurance to protect itself from an excessive catastrophe loss.

6.4 Does the reporting entity carry catastrophe reinsurance protection for at least one reinstatement, in an amount sufficient to cover its estimated probable maximum loss attributable to a single loss event or occurrence? Yes [X] No []

6.5 If no, describe any arrangements or mechanisms employed by the reporting entity to supplement its catastrophe reinsurance program or to hedge its exposure to uninsured catastrophic loss:
