NOTES TO FINANCIAL STATEMENTS**Note 1 - Summary of Significant Accounting Policies**

A. Accounting Practices:

The Standard Fire Insurance Company (the Company) prepares its statutory financial statements in conformity with accounting practices prescribed or permitted by the State of Connecticut. The State of Connecticut requires that insurance companies domiciled in Connecticut prepare their statutory basis financial statements in accordance with the National Association of Insurance Commissioners (NAIC) *Accounting Practices and Procedures Manual*, subject to any deviations prescribed or permitted by the Connecticut Insurance Commissioner. The Company has not applied for and does not believe that it employs any statutory accounting practices that would be considered a permitted practice in its financial statements.

B. Use of Estimates in the Preparation of the Financial Statements:

Note 2 - Accounting Changes and Corrections of Errors

During the first quarter of 2013, an error in the reporting of "Taxes, licenses and fees" (TL&F), "Receivable from/Payable to parent, subsidiaries and affiliates" and "Amounts withheld or retained by company for account of others" was detected. The error resulted in paid TL&F associated with business not covered by an affiliated reinsurance agreement not being allocated to the Company, causing an understatement of the reported amount in the TL&F payable account. In accordance with SSAP No. 3, *Accounting Changes and Corrections of Errors*, the Company corrected this error in the current statutory financial statement.

The correction resulted in an additional \$2.7 million to TL&F, offset by both a reduction of \$0.3 million in Amounts withheld or retained by company for account of others, and \$2.4 million to Receivable from/Payable to parent, subsidiaries and affiliates. This error did not impact Net income or Surplus as regards policyholders.

C. Reverse Mortgages:

No significant change.

D. Loan-Backed Securities:

- The Company applies the retrospective method of revaluing loan-backed securities. The Company's loan-backed securities are revalued quarterly using the constant effective yield method which includes an adjustment for estimated principal repayments, if any. The effective yield used to determine amortization for these securities is recalculated and adjusted periodically based upon actual historical and/or projected future cash flows. The Company changes from the retrospective to prospective method for valuing the securities when an other-than-temporary impairment has been recorded.

For collateralized mortgage obligations, asset-backed securities and pass-through certificates prepayment assumptions are adjusted periodically.

When unit prices published by the Securities Valuation Office were not available, the Combined Pool uses a nationally recognized pricing service, as well as broker quotes in determining the fair value of its loan-backed securities.

- Not applicable.

- Loan-backed and structured securities with other-than-temporary impairments are as follows:

Cusip	Amortized cost basis before other-than- temporary impairment	Projected cash flow	Other-than- temporary impairment recognized in loss	Amortized cost basis after other- than-temporary impairment	Fair value	Impairment Quarter / Year

NOTES TO FINANCIAL STATEMENTS

4. The gross unrealized investment losses and related fair value for impaired securities for which an other-than-temporary impairment has not been recognized as a realized loss were as follows:

a. The aggregate amount of unrealized losses:

1. Less than 12 Months	\$	203
2. 12 Months or Longer	\$	40,544

b. The aggregate related fair values of securities with unrealized losses:

1. Less than 12 Months	\$	16,728
2. 12 Months or Longer	\$	5,135,466

5. The Company determines an other-than-temporary impairment by utilizing discounted cash flow modeling to determine the present value of the security and comparing the present value with the amortized cost of the security. If the amortized cost is greater than the present value of the expected cash flows, the difference is considered a credit loss and recognized in net realized capital gains (losses). The Company estimates the present value of the security by projecting future cash flows of the assets underlying the securitization, allocating the flows to the various tranches based on the structure of the securitization, and determining the present value of the cash flows using the effective yield of the security at the date of acquisition (or the most recent implied rate used to accrete the security if the implied rate has changed as a result of a previous impairment or changes in expected cash flows). The Company incorporates levels of delinquencies, defaults and severities as well as credit attributes of the remaining assets in the securitization, along with other economic data, to arrive at its best estimate of the parameters applied to the assets underlying the securitization.

Note 20 - Fair Value Measurements

The Company's estimates of fair value for financial assets and financial liabilities are based on the framework established in the fair value accounting guidance. The framework is based on the inputs used in valuation, gives the highest priority to quoted prices in active markets, and requires that observable inputs be used in the valuations when available. The disclosure of fair value estimates in the fair value accounting guidance hierarchy is based on whether the significant inputs into the valuation are observable. In determining the level of the hierarchy in which the estimate is disclosed, the highest priority is given to unadjusted quoted prices in active markets and the lowest priority to unobservable inputs that reflect the Company's significant market assumptions. The level in the fair value hierarchy within which the fair value measurement is reported is based on the lowest level input that is significant to the measurement in its entirety. The three levels of the hierarchy are as follows:

- Level 1 - Unadjusted quoted market prices for identical assets or liabilities in active markets that the Company has the ability to access.
- Level 2 - Quoted prices for similar assets or liabilities in active markets; quoted prices for identical or similar assets or liabilities in inactive markets; or valuations based on models where the significant inputs are observable (e.g., interest rates, yield curves, prepayment speeds, default rates, loss severities, etc.) or can be corroborated by observable market data.
- Level 3 - Valuations based on models where significant inputs are not observable. The unobservable inputs reflect the Company's own assumptions about the inputs that market participants would use.

NOTES TO FINANCIAL STATEMENTS

- (3) The Company holds NAIC designation 3 – 6 securities at the lower of cost or market as defined in SSAP No. 26, *Bonds, excluding Loan-backed and Structured Securities*. Market fluctuations cause securities to change from being held at cost to fair value or vice versa. These changes result in a transfer in or out of level 3.

The Company transfers securities out of level 3 when it is able to obtain market observable data. The Company recognizes these transfers at the end of the period.

- (4) Bonds and preferred stock were carried at fair value in accordance with NAIC guidance. These securities were generally priced by the SVO or by a third party organization.

Note 25 – Change in Incurred Losses and Loss Adjustment Expenses

During the period from January 1, 2013 to June 30, 2013, the prior year-end total loss and loss adjustment expense reserves developed favorably by \$13,805,000, resulting from better than expected loss and DCC development primarily in the other liability – occurrence, special property, and homeowners lines, and from lower estimates for adjusting and other expenses.

The improvement in the other liability – occurrence line was concentrated in the excess coverages for accident years 2004 – 2010 and reflected more favorable legal and judicial environments than what the Company previously expected. This improvement was partially offset by unfavorable development in environmental reserves for “prior” accident years. The improvement in the special property line was driven by better than expected development for catastrophe and non-catastrophe claims in accident years 2010 – 2012. The improvement in the homeowners line was driven primarily by better than expected development for catastrophe and non-catastrophe claims in accident years 2011 and 2012. Lastly, the improvement in adjusting and other expense reserves was driven by improvement in the underlying loss and DCC reserves and by the allocation of adjusting and other expense reserves by year as disclosed in the Schedule P Interrogatories of the Company.

The remaining changes are generally the result of ongoing analyses of recent loss data and trends. A portion of the change from prior year effects relates to retrospectively rated policies, and these policies are subject to premium adjustments.
