Bill Cunningham
Senior Vice President, Business Insurance
33rd Annual AIFA Conference
March 3, 2008
Explanatory Note

This presentation contains, and management may make, certain “forward-looking statements” within the meaning of the Private Securities Litigation Reform Act of 1995. All statements, other than statements of historical facts, may be forward-looking statements. Specifically, earnings guidance, statements about our share repurchase plans and statements about the potential impact of the recent disruption in the sub-prime and other financial markets on our investment portfolio and underwriting results are forward looking, and we may make forward-looking statements about our results of operations (including, among others, premium volume, net and operating income, investment income, return on equity and combined ratio), and financial condition (including, among others, invested assets and liquidity); the sufficiency of our asbestos and other reserves (including, among others, asbestos claim payment patterns); the cost and availability of reinsurance coverage; catastrophe losses; investment performance; market conditions; and strategic initiatives. Such statements are subject to risks and uncertainties, many of which are difficult to predict and generally beyond our control, that could cause actual results to differ materially from those expressed in, or implied or projected by, the forward-looking information and statements.

Some of the factors that could cause actual results to differ include, but are not limited to, the following: catastrophe losses could materially and adversely affect our results of operations, our financial position and/or liquidity, and could adversely impact our ratings, our ability to raise capital and the availability and cost of reinsurance; if actual claims exceed our loss reserves, or if changes in the estimated level of loss reserves are necessary, our financial results could be materially and adversely affected; our business could be harmed because of our potential exposure to asbestos and environmental claims and related litigation; we are exposed to, and may face adverse developments involving, mass tort claims, such as those relating to exposure to potentially harmful products or substances; the effects of emerging claim and coverage issues on our business are uncertain; we may not be able to collect all amounts due to us from reinsurers, and reinsurance coverage may not be available to us in the future at commercially reasonable rates or at all; the intense competition that we face could harm our ability to maintain or increase our profitability and premium volume; we are exposed to credit risk in certain of our business operations and in our investment portfolio; the insurance industry and we are the subject of a number of investigations by state and federal authorities in the United States, and we cannot predict the outcome of these investigations or their impact on our business practices or financial results; our businesses are heavily regulated, and changes in regulation may reduce our profitability and limit our growth; a downgrade in our claims-paying and financial strength ratings could adversely impact our business volumes, adversely impact our ability to access the capital markets and increase our borrowing costs; our investment portfolio may suffer reduced returns or losses; the inability of our insurance subsidiaries to pay dividends to our holding company in sufficient amounts would harm our ability to meet our obligations and to pay future shareholder dividends; disruptions to our relationships with our independent agents and brokers could adversely affect us; we are subject to a number of risks associated with our business outside the United States; we could be adversely affected if our controls to ensure compliance with guidelines, policies and legal and regulatory standards are not effective; our business success and profitability depend, in part, on effective information technology systems and on continuing to develop and implement improvements in technology; certain significant multiyear strategic information technology projects are currently in process but may not be successful; and if we experience difficulties with technology, data security and/or outsourcing relationships, our ability to conduct our business could be negatively impacted.

Our forward-looking statements speak only as of the date of this presentation or as of the date they are made, and we undertake no obligation to update forward-looking statements. For a more detailed discussion of these factors, see the information under the caption “Risk Factors” in our most recent annual report on Form 10-K filed with the Securities and Exchange Commission.

In this presentation, we may refer to some non-GAAP financial measures, including, among others, operating income, operating income excluding catastrophes, operating return on equity, underwriting gain (loss), GAAP combined ratio excluding catastrophes and prior year development and adjusted and tangible book value per common share. For a reconciliation of these measures to the most comparable GAAP measures and a glossary of financial measures, we refer you to the press release and financial supplement that we have made available with our quarterly earnings release which is available on the Travelers website under the investor section (www.travelers.com).
